Stack41, LLC., hereby disclaims all copyright interest in the following programs, written by Davis Remmel:

- Data Center Manager, which organizes and composites links and configurations between data center equipment
- ShRx, which composites virtual machines through stage-based payloads
- pfSense Pair, which uses ShRx to compose dual virtual machines entangled as a CARP pair
- TimescaleDB Pair, which uses ShRx to compose dual virtual machines acting as redundant databases
- Stuck Meter, which detects when computer processes are running too long
- IoT Appliance, which composes a hard disk image for TBox units based on Alpine Linux, and all scripts contained therein, including:
  - Tag reader system service, which runs from a TBox to read tag/value pairs from connected devices
  - Cellular system service, which maintains a cellular connection on TBox hardware
  - VPN system service, which maintains a VPN link from TBox hardware to the Stack41 IoT cloud
